

Uncertified control panels can represent a safety hazard in your facility.

Trust Converge Engineering’s panel building capabilities. Our UL508A certification ensures our control panels are safe and meet all industry standards. We use Allen Bradley, Mitsubishi, Schneider and other UL compliant components to deliver quality control panels that will stand the test of time. CE’s engineers routinely work with PLC’s, HMI’s, motor controls, servos, safety circuits and other electrical hardware.

Converge Engineers can build and supply control panels to meet the needs of any process. From the simplest of machine equipment to the most advance industrial process our team can handle it all.

Why risk having your control panels being improperly built and unsafe?

Panel Assemblies

- Motor controllers
- PLC programming and troubleshooting
- HMI’s
- Overload relays
- Fused disconnects / circuit breakers
- Buttons, switches, timers and controllers
- Wiring
- Terminals
- Enclosures

Industrial Machinery

- Metal working machine tools
- Plastics machinery
- Wood machinery
- Assembly machines
- Material handling machines
- Inspection and testing machines
